Course Description: ART 105 serves as a studio course of descriptive drawing and painting (to render and interpret what is visually observed by the artist). The foci of the studio will be the exploration of the formal elements of art in relation to constructing strong compositions, the concepts of value, space, form and expression and the study of the aesthetic, physical and psychological properties of chroma and color theory. Each project is designed to allow the artist to acquire or refine the technical and conceptual skills that are necessary for serious artistic endeavors.

Course Goals and Performance Objectives: Upon completion of this course, students will be able to:

- 1 Demonstrate an understanding of the formal elements, (line, shape, value, texture, and color) as they relate to the principles of visual organization, (harmony, balance, rhythm and repetition, movement, dominance, and proportion).
- 2 Successfully work in both dry and wet media to proficiently render objects in two-dimensional space through atmospheric or intuitive perspective, color relationships and chiaroscuro.
- 3 Produce two-dimensional visual images which explore various methods of achieving strong compositions which explore subject matter as well as subject meaning
- 4 Develop criteria to successfully analyze and critically discuss their work.

Student Evaluation and Grading: There will be six assignments (8 drawings and paintings) worth 100 points each. All projects will be evaluated with regards to composition, understanding of assigned technique, craftsmanship, value ranges, handling of media, comprehension of color theory and creativity. Students will also receive grades for their performance and participation in formal critiques. Your final grade will be an average from the following categories:
