

OXFORD COLLEGE

Geosciences 115 - Meteorology and Climatology

Spring 2014

Goals for the course: Geosciences 115 (Meteorology and Climatology) has been designed for either the environmental studies major or for a student who wants an interesting laboratory science course as part of their liberal arts education. As such, no prior background is assumed or necessary, just a desire to learn and an interest in the natural world. Meteorology and Climatology will give students an understanding of scientific investigation as it relates to our atmosphere. The students' observational skills will be considerably improved through the analysis of weather phenomena. Basic mathematical skills will be mastered through calculations of weather and climate parameters in the laboratory. The laboratory is highly mathematically oriented. Students will also gain an appreciation of the processes that create weather and how biomes relate to climates. These are concepts that they will be able to use outside of the classroom and in their daily lives.

Course Announcements

Instructor: Dr. Stephen W. Henderson

Office: 106 Pierce Hall

Office Phone: (770) 784-8345

Office Hours: Monday and Wednesday (10:45-12:00) and other times by appointment or walk-in's. I'm usually in my office and available.

Text: Lutgens & Tarbuck, 2013, The Atmosphere: An Introduction to Meteorology, 12th ed,

Lab Manual: Carbone, 2013, Exercises for Weather & Climate, 8th ed. (It has to be the 8th edition)

Recommended (not at all required): Pretor-Pinney, 2006, The Cloudspotter's Guide, Perigee (Penguin Books)

Organization: The class will meet for lecture 3 times each week:
Monday, Wednesday, and Friday from 9:30 - 10:35.
The laboratory section meets from 2:30 – 5:30 on Wednesday.

Attendance: All students are expected to attend all scheduled lecture and laboratory sessions. Attendance will be taken. No unexcused cuts are allowed in lab. Students who have an absence in lab will have their final grade reduced 3 points per absence. A student who has four or fewer lecture cuts for the entire semester will receive the addition of two points to the final course average. There are no excused absences.

Students having six or more lecture absences will have their final course grade reduced one point per absence starting with the sixth absence.

Being late to class can be rude and distracting. If it happens, please be as unobtrusive as possible when you enter class. Three times of being late will be considered equal to one absence. If you come in late, it is your responsibility to see me immediately after class to ensure that you are marked late and not absent. No adjustments will be made at a later time. When you are in class, you must be attentive and not disturb others. Leaving a class early will be counted as an absence as does sleeping through a class or being generally inattentive. Cell phones are to be turned off and put away and can't be used during lecture or laboratory tests (including use as calculators). Bring a calculator to lab.

Honor Code: The Honor Code of Oxford College applies to Geosciences 115. All quizzes, tests, and exams will be done individually with no non-sanctioned additional materials or help. The laboratory exercises can be done with other students and with the instructor's help. If you are unsure whether or not an action may result in an honor code violation, ask the instructor first. The Honor Code at Oxford College is quite serious.

Grading System: Geosciences 115 will use the plus-minus grading system. The distribution of grades is as follows:

A	93-100	C+	77-79
A-	90-92	C	73-76
B+	87-89	C-	70-72
B	83-86	D+	67-69
B-	80-82	D	60-66
		F	59 and below

Evaluation: Lecture will comprise 54% of your final average and lab will comprise 46%. It is broken down as follows:

Highest Half-Test	15%
(Lowest half-test grade is dropped)	
Lecture Half-Test #1 on 1/31	
Lecture Half-Test #2 on 3/24	
Lecture Hourly Test on 2/21	15%
Final Exam Tues 5/6 2:00-5:00 pm	20%
Lab Reports (6)	12%
Lab Quizzes (best 4 of 5)	8%
Lab Exam #1 on 2/26 in lab	10%
Lab Exam #2 on 4/23 in lab	10%
Weather Journal (due 2/7 & 4/16)	6%
Class Participation in lecture	4%

The **lecture half-tests, hourly test, and final exam** will consist of short to medium-length essays, combined with objective multiple choice and matching questions. The **lab quizzes** will be short answer and are given at the beginning of lab and cover the written material in the laboratory manual for that day's exercise. The **lab reports** will be turned in at the end of lab and the **lab exams** will cover material learned in lab. The **weather & cloud journal** will consist of twice daily observations of the atmosphere. The entries should include time and place of observations; weather conditions; including cloud types (with sketches) and cloudiness; approximate temperature, wind direction, and speed; and any other significant weather conditions including changes from the previous observation. These entries should not be downloaded from a local weather station, but instead will be estimated and described by the observer (you). Photos can also be added. A separate journal (other than the course notebook) is required.

Student work submitted as part of this course may be reviewed by Oxford College and Emory College faculty and staff for the purposes of improving instruction and enhancing Emory education.

Class participation is based primarily upon responses in lecture, including asking questions, providing insights into the material, and answering questions. In other words, being part of the discussion. Being an active learner is an excellent way to gain much from the course and receive the high participation grade that you deserve.

Tentative Lecture Schedule and Reading Assignments:

<u>Day</u>	<u>Topic for the Week</u>	<u>Text Assignment for the Week</u>
W 1/15 F 1/17	Introduction to the Atmosphere	Chapter 1
M 1/20 W 1/22 F 1/24	No class – MLK Start Weather Journals Heat & Temperature	Chapters 2 & 3
M 1/27 W 1/29 F 1/31	Lecture Half-Test #1	
M 2/3 W 2/5 F 2/7	Moisture & Atmospheric Stability Weather Journals Due	Chapter 4
M 2/10 W 2/12	Condensation & Precipitation	Chapter 5

Turned In?**

Turned In

Quiz?

No

1/29	#2 Earth-Sun Geometry	No	Quiz
2/5	#3 The Surface Energy Budget	Turned In	No
2/12	#5 Atmospheric Moisture	No	Quiz
2/19	#6 Saturation & Atmospheric Stability	No	Quiz
2/26	Laboratory Exam #1		
3/5	#9 Weather Map Analysis	No	Quiz
3/19	#10 Mid-latitude Cyclones	Turned In	No
3/26	#12 Thunderstorms & Tornadoes	No	Quiz
4/2	Weather of Oxford, GA	Turned In	No
4/9	#14 Climate Controls	Turned In	No
4/16	#15 Climate Classification	Turned In	No
4/23	Laboratory Exam #2
