

THE DIVISION OF PHYSICAL EDUCATION AND DANCE

PREFACE

Oxford College is committed to the liberal arts. The liberal arts curriculum for centuries has included the study of physicality and its relationship to mind and spirit. From Plato's Academy to the present, institutions that espouse the study of the liberal arts make physical education an integral part of the curriculum. The study of physicality includes but is not wholly limited to:

1. The refinement of the senses.
2. The maintenance of health, physical strength and stamina.
3. The management and control of body based emotions.
4. An appreciation of kinesthetic awareness, which includes the joy of movement and exploration of human movement as a form of expression.
5. The acquisition and refinement of perceptual motor skills.
6. An awareness that there is an intrinsic relationship between body, mind and spirit and that inadequacies in one of these affects the other two.

The courses within the three areas in the Division of Physical Education and Dance emphasize certain elements of physicality with some elements being emphasized more than others. By enrolling in three courses in three different areas students will be exposed to all six elements of physicality to one degree or another.

Course Description:

Tai Chi is a form of Chinese martial art and an exercise form that involves breathing exercise, meditation, slow, graceful, and precise body movements to enhance well-being and health. Tai Chi focuses on a balance of the internal and external environment with many exercises to facilitate mental and muscular relaxation as well as flexibility.

The Goals of the Course

At the conclusion of the course, the student will:

1. Explain the philosophy of Tai Chi and its history.
2. Apply the fundamental terminology and principles for Tai Chi.
3. Demonstrate basic techniques such as stance, hand movement, body movement, punching, blocking, striking, and kicking.
4. Learn and use skills in relaxation, meditation, and deep concentration for mental wellness.
5. Improve the fitness components needed for better health.
6. Demonstrate fundamental technique formation.
7. Learn to apply the skill for self-defense purpose.

Course Content (topics)

- A. Lectures: Class orientation and general introduction; history, legend, styles and development of Tai Chi Chuan; principles, philosophy, and fundamental knowledge of Tai Chi; current research on Tai Chi and benefits of practicing Tai Chi; Ying Yang theory and its relationship with Tai Chi Chuan; features and characteristics of Tai Chi.
