

*Note: Student work submitted as part of this course may be reviewed by Oxford College and Emory College faculty and staff for the purposes of improving instruction and enhancing Emory education.*

**Fall 2018**  
**MATH 100**  
**Oxford College of Emory University**

---

**GENERAL INFORMATION**

<b>Instructor</b>	Dr. Karen Rogers
<b>Email</b>	karen.m.rogers@emory.edu
<b>Office</b>	Pierce 129
<b>Office Hours</b>	TBA (Will be posted on Canvas.) Individual help is also available (for all math courses) in the Math Center.
<b>Textbook</b>	Precalculus, 10th edition, Ron Larson, 2018
<b>Class Website</b>	Canvas: <a href="http://canvas.emory.edu">http://canvas.emory.edu</a>
<b>Course Content</b>	Math 100 is designed to review algebra, trigonometry, exponential and logarithmic functions in order to prepare students for Math 110A.

**COURSE GOALS AND OBJECTIVES**

The purpose of MATH 100 is to prepare students for calculus by focusing on technical skills and conceptual understanding. Calculus combines various aspects of mathematical thinking. Having technical skills at one's fingertips will allow students to more easily focus on the important concepts of calculus without being distracted by algebraic calculations and other similar details. With this in mind, students should at the conclusion of the course be able to demonstrate proficiency with the following:

- Simplifying algebraic expressions
- Solving equations reducible to linear, quadratic, higher-degree polynomial equations
- Solving equations involving trigonometric, logarithmic, or exponential expressions
- Solving inequalities
- Graphing lines, parabolas, absolute value functions, circles and semi-circles, trigonometric and inverse trigonometric functions, logarithmic functions, and exponential functions
- Proving trigonometric identities

## COURSE COMPONENTS

<b>Homework</b>	<p>Homework will be assigned daily. Students should expect to spend at least 2 productive hours of study for each class session, or about 6 to 8 hours per week. Students are encouraged to keep a thorough and organized set of notes and worked homework problems for the course.</p> <p>Students are also encouraged to ask questions of the instructor about any problems with which they struggled in these assignments – either at appropriate times during class or during the instructor’s office hours. Homework exercises usually will not be collected but are for the benefit of the student. That said, students should expect quizzes that count towards their final grade that are based on the homework.</p>
<b>Quizzes</b>	<p>There will be quizzes typically on problems similar to those seen in homework previously assigned. These quizzes may be announced or unannounced, although the latter is more likely. Students will not be allowed to make up quizzes missed due to ANY absence.</p>
<b>Exams</b>	<p>There will be four closed book, in-class exams. Examinations will be based on material presented in-class and problems done in class or on homework. All exams are cumulative in nature in so much as previous skills are often used in combination with new material. These exams will be announced a week in advance.</p>
<b>Final Exam</b>	<p>There will be a comprehensive final exam. The final exam will be required for everyone.</p>

## GRADING

Students’ grades will be computed in the following way:

Quizzes	25%
4 Exams	50%
Final Exam	25%

### Grade Assignment

Letter grades will be given in accordance with the following: A: 90-100%; B: 80-89%; C: 70-79%; D: 60-69%; F: 0-59%. Letter grades of A-, B+, B-, C+, C-, and D+ may be given for percentages near these cutoffs at the discretion of the instructor.

## COURSE POLICIES

<b>Websites &amp; Email</b>	Announcements, homework assignments, corrections, hints for problems, and other material will be posted on Canvas. Students are expected to check their Emory email address and Canvas regularly to obtain course related information.
<b>Calculators &amp; other Devices</b>	NO calculators or other devices (e.g., cell phones, iPads, etc.) will be allowed on exams or quizzes. All written solutions must be legibly written and sufficiently justified to receive full credit.
<b>Attendance</b>	Students are responsible for any information given out in class. If a student knows ahead of time they will not be in class, please make arrangements to find out what you missed. Again, exams will be based on material presented in-class, in text, and in homework, and there are no make-up quizzes. Therefore it is in students' best interest to attend every class and take detailed notes.
<b>Written Style</b>	<p>Expressing complete thoughts and arguments require complete sentences. In mathematics, where clarity of thought is paramount, this is no less true. Granted, with mathematical symbols one can write these sentences very efficiently – but they are sentences nonetheless. Consider “<math>1 + 1 = 2</math>”. This is a complete sentence. (It has a subject “<math>1 + 1</math>”, verb “<math>=</math>” and predicate “<math>2</math>”)</p> <p>To this end, written work in this class should be in complete sentences. One should use mathematical symbols wherever appropriate. Student work should also be neat and orderly to be intelligible. With all honesty, “clean style helps to clean up messy thinking.”</p> <p>To emphasize the importance the instructors attach to good style when writing mathematics, written work in this class (exams &amp; quizzes) will be graded not only on the correctness of the calculations shown, but also on the quality of their presentation.</p>
<b>Make Up Tests &amp; Homework</b>	<p>Students are expected to be present for all scheduled tests. Any conflicts should be brought to the instructor's attention as soon as possible. If a legitimate reason exists for missing a test – as determined by the instructor – then the test must be taken prior to the regularly scheduled date. In the unusual circumstance where taking the test early is not possible, <b>students should be aware that any make-up tests given will be designed to be more difficult to offset the additional time given for study.</b> The final exam cannot be rescheduled.</p> <p>Students must provide written documentation in advance of any special accommodations required for testing (or for any other activities). This includes additional time or other needs.</p>
<b>Academic Integrity</b>	THE HONOR CODE OF OXFORD COLLEGE APPLIES TO ALL WORK SUBMITTED FOR CREDIT IN THIS COURSE. TO RECEIVE CREDIT FOR WORK SUBMITTED YOU MUST PLACE YOUR NAME ON IT. BY PLACING YOUR NAME ON SUCH WORK, YOU PLEDGE THAT THE WORK HAS BEEN DONE IN ACCORDANCE WITH THE GIVEN INSTRUCTIONS AND THAT YOU HAVE WITNESSED NO HONOR CODE VIOLATIONS IN THE CONDUCT OF THE ASSIGNMENT.

**Religious  
Holidays  
Arrangements**

Instructors are encouraged, not required, to accommodate students' academic needs related to religious holidays. Please make every effort to negotiate your religious holiday needs within the first two weeks of the semester; waiting longer may compromise your instructor's ability to extend satisfactory arrangements. If you need guidance negotiating your needs related to a religious holiday, the College Chaplain, Rev. Lyn Pace, [ppace@emory.edu](mailto:ppace@emory.edu), Candler Hall 202, is willing and available to help. ★★ Please be aware that Rev. Pace is not tasked with excusing students from classes or writing excuses for students to take to their professors. Emory's official list of religious holidays may be found at [www.religiouslife.emory.edu/faith\\_traditions/holidays/html](http://www.religiouslife.emory.edu/faith_traditions/holidays/html).

**Students with  
Differing  
Abilities**

The Office of Accessibility Services (OAS) works with students who have disabilities to provide reasonable accommodations. In order to receive consideration for reasonable accommodations, students must contact OAS and complete the registration process. Faculty may not provide disability accommodations until an accommodation letter has been processed; accommodations are not retroactive. Students registered with OAS who receive a letter outlining specific academic accommodations are strongly encouraged to coordinate a meeting time with their professor to discuss a protocol to implement the accommodations as needed throughout the semester. This meeting should occur as early in the semester as possible. Contact OAS for more information at (770) 784-4690 or [oas\\_oxford@emory.edu](mailto:oas_oxford@emory.edu). Additional information is available at the OAS website at <http://equityandinclusion.emory.edu/access/students/index.html>.
