

Psychology 100
Introductory Psychology
Fall 2008

Instructor: Dr. Sharon Lewis
Office: 214B Seney Hall, Office Tel 4-8374
Office Hours: Mon: 11:00-12:30, Wed: 10:30-12:30
Tues/ Thurs: 3:45-4:15

These hours are subject to change. Other times by appointment.

“Body and soul are not two different things, but only two different ways of perceiving the same thing. Similarly, physics and psychology are only different attempts to link our perceptions together by way of systematic thought.”
- Albert Einstein

Class Organization

My goals for you:

- 1) I hope you will gain a better understanding of the science of psychology. I think this will be an advantage to you no matter what your chosen occupation. Psychological information is often critical in understanding the many feelings and experiences you will have throughout your life.
- 2) I hope that your ability to analyze and evaluate scientific information will grow enabling you to utilize this information in your everyday life.
- 3) Finally I hope you have a great time in this course; learning about why people and animals behave the way they do should be a lot of fun. So relax, (but not too much), get ready to question all those “truths” you hold so dear, and have a good semester.

Attendance: The class will meet 2 times a week and although attendance is not required, it is strongly recommended. It is rare for a student to earn an “A” in my class without attending class regularly because the exams will include items based on information found only in my lectures and I will often give you hints as to what might appear on the exam. I will take attendance so that I can learn everyone’s names and to possibly help you earn a higher grade (See below for explanation). In addition, from time to time, there will be some fun and interesting class exercises you can participate in which will help you understand some of the basic concepts in psychology.

Blackboard (BB): You are required to sign onto the Introductory Psychology Blackboard conference (**for your section**, e.g., 10J, 11J, or 2J) **by Thurs, Sept 18)** and write a 1-2 paragraph essay reflecting your thoughts on something you’ve learned in Introductory Psychology. To get to the BB site, go to: <http://classes.emory.edu> and log in using your University Network ID and the password that you use for OPUS. I will post your syllabus, review sheets, and any changes in assignments, test dates, and office hours on this conference. In addition, I have a number of illustrations and fun web sites on BB. I hope our class conference will also be a place where we can continue

discussions started in class, so visit often and post frequently. If you would like to form a study group, please feel free to use our discussion board.

Calculating your grade: The final grade will be based on 4 exams, none of which will be comprehensive and each worth 100 points for a possible total of 400 points. I give make-up tests (which are all essays) only for officially excused absences. I will assign a letter grade to the total points accumulated during the semester so at no point will I compute an average grade. An A requires a minimum of 360 points, a B 320, a C 280, a D 240, and anything below 240 points is an F. If your total puts you a few (2-3) points below a higher grade, I will take into consideration your attendance and participation (in class and on Blackboard) when assigning your grade. Please make sure that you are familiar with the College's Honor Code.

Knowledge fills a large brain; it merely inflates a small one.

Sydney J. Harris

The mind is like a parachute - it works best when it is open.
