CLASS POLICIES FOR STRESS REDUCTION ACTIVITY

I have access to a copy of the course syllabus and have read it. Further, the instructor has explained:

1) the course requirements, 2) the policies on attendance, and 3) the grading policies. I have had an opportunity to ask questions and understand the three areas listed above.

WARNING OF RISK FOR STRESS REDUCTION ACTIVITY

Every sport has certain inherent risks and regardless of the precautions taken, it is impossible to ensure the safety of the participant. The physical activities in this class require a certain degree of physical exertion and concentration. These activities are reasonably safe as long as certain guidelines are followed. Students having a physical condition that precludes such activity should see the instructor before participating.

Many injuries may occur while participating in this class. Some examples of possible injuries are:

1. bruises and abrasions
2. muscle sprains and strains
3. joint injuries
4. broken bones
5. heat exhaustion and/or heat stroke; frostbite and hypothermia
6. cardiovascular incidents

These and other injuries may occur as a result of such hazards as:

1. environmental factors
2. vehicular traffic
3. equipment failure
4. allergic reactions to insect bites

To help reduce the likelihood of injury to yourself and other students, the following rules need to be followed while in class:

1. warm-up and stretch adequately
2. prepare mentally for each class
3. be aware of surroundings during activity
4. drink adequate water before, during, and after class
