Course Description: Econ 112 presents the main national economic issues of unemployment, inflation and economic growth in the context of a theory of national income determination. The course begins by describing the economic problems facing every society and the possible ways that society can organize itself to solve these problems. The laws of demand and supply are examined.

Next, the measurement of the flow of national income and its major components, such as consumer spending, is summarized. These concepts become the basis for an explanation of the size of the total flow of income, and for policy recommendations to influence the size and stability of that flow. Aggregate demand for final output and aggregate supply of it are used to analyze business cycles, the deficit and fiscal policy. After describing money and the banking system, the role of the Fed in setting monetary policy is presented.

The twin problems of unemployment and inflation are then put into a theoretical, historical and policy perspective. The analysis is extended to include the balance of international payments and the foreign currency exchange markets. The course concludes by examining factors that contribute to the long-run growth of national income and the development of the infrastructure of an economy.

The Great Recession triggered by the Financial Meltdown and the subsequent “jobless” recovery/foreclosure crisis/financial reform events will be emphasized.

Course Objective: the goal of Econ 112 is to develop a framework which the student may use to analyze the overall behavior of modern national mixed capitalist economies. This framework introduces the student to the economic way of thinking about the macro-level forces at work in society which shape economic performance and guide economic policy. Performance and policy then feed back to influence the business and social environment.

Method of Instruction: Econ 112 is taught through a combination of lecture & discussion. Class interaction allows the students to discover the strengths and weaknesses of past and current policy executed by U. S. policy-makers. The first-

person perspective is valued in this course and is cultivated using expository writing.

Student work submitted as part of this course may be reviewed by Oxford College and Emory College faculty and staff for the purposes of improving instruction and enhancing Emory education.

Examinations, Homeworks, and Quizzes: There will be two in-term exams and a comprehensive final exam. Several homeworks and announced quizzes will be assigned during the semester. Homeworks will include problem sets and writing responses to assigned readings.

Grading Policy: Each exams accounts for 30% of the course grade—homeworks and announced quizzes account for the remaining 10% of the grade. Several of your assignments will be ungraded; ungraded but completed work will be assigned a numerical grade of 94—the lowest numerical value of an A grade. Your numerical average will be converted into a final letter grade:

- A = 94 up to 100
- A- = 90 up to 94
- B+ = 87 up to 90
- B = 84 up to 87
- B- = 80 up to 84
- C+ = 77 up to 80
- C = 74 up to 77
- C- = 70 up to 74
- D+ = 67 up to 70
- D = 60 up to 67
- F = 0 up to 60

Attendance Policy: Attendance is required and will be recorded. One point will be deducted from the student's final numerical grade for each absence in excess of three absences.

Make-up Examination Policy: Make-up examinations are given by permission of the course instructor. Students must contact the instructor in writing prior to the scheduled exam in order for an excuse to be considered.

Honor Code – Students should re-read the honor code prior to taking this course. Academic misconduct will not be tolerated.
