

Biology 141(Q) Cell Biology and Genetics Syllabus
Fall Semester 2013
Section 08A

Professor: Dr. Steve Baker

Lecture Hours: MWF 8A 8:15-9:20, in Pierce 101
Lab Wednesday 1:40-4:40, Pierce 123

Office Hours: By chance or by appointment; I am generally here from 8-5 daily. Just come by or see me after class or email to set up. You are welcome to talk to me anytime if I am in the office or lab.

Required Texts: *Campbell Biology*, Reece, J.B., Urry, L.A., Cain, M.L., Wasserman, S.A., Minorsky, P.V., and Jackson, R.B. 2011, 9th edition, Benjamin/Cummings Publishing; *Practicing Biology*, Heitz, Jean and C. Griffen. Benjamin/Cummings Publishing Co., Inc. 2011

Optional Writing Book: *A Student Handbook for Writing in Biology*, Karen Knisely, 2005, 2nd edition, W.H. Freeman and Co. This is a great resource for writing, and is on reserve in the library.

Required Lab Text: SYMBIOSIS: *Investigating Biology*, 7th ed. Morgan, J. G. and M. E. B. Carter. Benjamin/Cummings Publishing Company, Inc. 2011. A customized edition published for BIO 141 is available in the bookstore. ***Used lab manuals are not permitted.***

Web Site: Mastering Biology (www.masteringbio.com) provides online study materials; practice exams, learning activities, and strategies for success. Your text has instructions for accessing the site.

Course Objectives: This course is designed to serve as an introduction to the basic themes of biology and to begin your training as a scientist by introducing you to the basics of investigative science and science writing. The topics covered by the course will expose you to the basics of biology at the molecular, cellular, and organismal levels. Initially, you will learn about biological molecules and how they lead to cell structure and function. Secondly, we will learn about vital cell functions such as transport and the production of energy. A third objective will include the basics of molecular biology and inheritance, and how genetics is responsible for the evolution of populations. Your work in the lab will involve investigations addressing these topics, in order to broaden your understanding and to help you begin to learn how to “think and act like a scientist.” These basic themes will prepare you well for more advanced study in biology. *This course fulfills the inquiry (INQ) and the Continuing Writing Requirement (WR).*

BIOLOGY 141 SPRING 2013 LECTURE SCHEDULE

Date	Topic	Assigned Reading
W, Jan 16	Science as a Way of Knowing	1
F 18	Major themes in Biology	1
M 21	Martin Luther King Day – no class	
W 23	Hierarchies: beginning with living chemistry and water	2,3
F 25	Building biological macromolecules: carbohydrates and lipids	4, 5
M 28	Proteins and nucleic acids	5
W 30	Structure and function revealed in cells	6
F, Feb. 1	Cellular Case Studies	
M 4	Membrane structure and cellular transport	7
W 6	Transport problems	
Th 7	<i>Scientific Literature & Research (Library - Required)</i> 8:00 – 8:45am and 9:00 – 9:45am	
F 8	Fundamentals of energy transformations: enzymes, ATP and electron carriers	
		8
M 11	Cellular respiration I - Glycolysis	9
Tu 12th	EXAM I 8:00 - 9:30 a.m. (through membrane transport)	
W 13	Cellular respiration II - Transition and the Krebs Cycle	9
F 15	<i>Presentation of Scientific Data – bring your lab data to class</i>	
M 18	Cellular respiration III – Chemiosmosis and The Electron Transport System	9
W 20	Review and recapitulation: Accounting Day	
F 22	Homage to photosynthesis	10
M 25	Photosynthesis I: the light dependent reactions	10
W 27	Photosynthesis II: the light independent reactions and variations (C4 and CAM)	10
F, Mar. 1	Cell reproduction: cell cycle, mitosis	12
M 4	Sexual life cycles and meiosis	13
Tu 5th	EXAM II – 8:00 – 9:30 a.m. (through photosynthesis)	
W 6	Chromosomal mutations	15 pp. 297-300
F 8	Mendelian principles; genes and chromosomes	14, 15 pp. 286-288
March 11 - 15	***SPRING BREAK**	
M 18	Patterns of inheritance	14 pp. 271-281
W 20	Chromosomal theory and linkage	15
F 22	Genetics problems and review OR LAB EXAM II	
14, 15		
M 25	DNA structure	16
W 27	DNA replication	16
Th 28	8:00 – 8:45, 9:00 – 9:45 a.m. - <i>Effective Presentations Workshop - Pierce 206 (optional)</i>	
F 29	Gene to Protein I: transcription and the genetic code	17
M, Apr. 1	Gene to Protein II: translation and genetic mutations	17
W 3	Modeling Beyond Watson and Crick	
F 5	Molecular genetics workshop <i>Scientific Papers – “Ask THE EDITORS” 2:30-3:30 p.m.</i>	

M	8	Charles Darwin and development of evolutionary concepts	22
Tu	9	EXAM III - 8:00 – 9:30 a.m. (through genetics)	
W	10	Evidence for evolution	22, 25 pp.510-512;530
F	12	Genetic Variation, Population Genetics and Hardy-Weinberg	23
M	15	Microevolution: genetic drift, gene flow and mutation	23
W	17	Selection and Speciation <i>Research papers due in class</i>	23, 24
F	19	Evolution of land plants	29
M	22	Sexual Encounters of the Floral Kind	38 pp.801-807
W	24	Bryophytes and seedless vascular plants	29
F	26	Seed plants: gymnosperms and angiosperms	30
M	29	Evolutionary trends in land plants & Big Themes Revisited	

***** FINAL EXAMINATION ***May 1, Wednesday 2-5 p.m.*****

BIO 141 Tuesday Laboratory Schedule

Spring 2013

Dr. Steve Baker

<u>Date</u>	<u>Lab Topic</u>	<u>Writing Assignment*</u>
Jan. 22	Scientific Investigation	Materials and Methods; Title page
29	Microscopes and Cells	Review table**
Feb. 5	Diffusion and Osmosis	Introduction; References
12	Enzymes	Results; Table; Figure
15	<i>Respiration/Fermentation Proposal posted to Blackboard by 2 p.m.</i>	
19	Cellular Respiration and Fermentation	Title page; Figure; Discussion; References
21	(Thur.) LAB EXAM (thru Enzymes) (Sign up for exams at 6:00 p.m. or 6:30 p.m.)	
26	Mitosis and Meiosis	Comparison Table**
Mar. 5	Research Teams: Proposal Development <i>Team Research Proposal submitted to Blackboard on Friday March 8th, by 2 p.m.</i>	
11 - 15	*** SPRING BREAK ***	
19	Field Research: Ecology and Evolution on the Outcrops	
21	(Thur.) LAB EXAM (Mitosis and Meiosis) (6:00 p.m. or 7:00 p.m.)	
26	Microbial Diversity (Bacteriology)	<i>Research papers due in class 4/17</i>
Apr. 2	Research Symposium <i>Technology Rehearsal - Upload and check your presentation in P101 at the start of lab.</i>	
9	Molecular Biology	Map**
16	Plant Diversity I & II	
23	Bioinformatics: Molecular Phylogeny of Plants	<i>Report completed in lab</i>

**25th (Thurs.) LAB EXAM (Outcrops, Bacteriology, Molecular Biology and Plant Diversity I & II)
(6:00 p.m. or 6:30 p.m.)**

***Writing assignments are due one week later at the beginning of the lab period unless otherwise noted.**

****These assignments are *not* turned in for a grade**

Important Dates for Biology 141 (includes lab and out of class sessions)

January:

29 Materials & Methods; Title page due in lab

February:

7 *Literature workshop, preliminary references due (required)*
12 Title page, Introduction; References due in lab
12 Exam I
15 *Effective data presentation workshop – bring your data and laptops to class*
15 Respiration/Fermentation proposal due on Blackboard by 2 p.m.
19 Results; Table; Figure due in lab
21 Lab Exam I
26 Title page; Figure; Discussion; References due in lab

March:

5 Exam II
8 Laboratory research project proposals due on Blackboard by 2 p.m.
21 Lab Exam II
28 *Effective presentations workshop (optional, 1 group member must attend)*

April:

1 Research symposium (*Technology Rehearsal 8 am 5*
5 *“Ask the Editors” session 2:30-3:30 pm*)
9 Exam III
17 Research paper due in class
23 Molecular phylogeny report completed in lab
25 Lab Exam III

May: 1 Final Exam, 2-5 PM

Expectations, Evaluation and Tips for Success in Biology 141

Welcome to Biology 141! Please read carefully and follow the information in this handout and any accompanying materials. You are responsible for understanding all of the information presented here, so please ask questions if needed. Please pay attention to any changes to the syllabus as some information may be subject to change during the semester.

Introductory Biology (141) is designed for students who **plan to major in biology or neuroscience and behavioral biology**, attend **professional school in a health related field**, or have a **strong background in biology** and have chosen biology to fulfill their distribution requirements. This may be one of the more difficult courses you will take, demanding that you learn detailed and complex information, organize this information around conceptual themes and apply your knowledge. This knowledge will be essential to your success in other biology courses, therefore it is crucial for you to

succeed in this course. Many of you will be taking examinations to enter graduate or professional schools, and the knowledge you gain here will be required for your success.

Tips for Success: Biology 141 is an intensive course and requires time. To perform well in this course, you must develop a proper plan for managing your time and your work, beginning from the first day of class. The following are some good study habits that will help you succeed in BIO 141:

- 🌿 **Keep up with assigned readings.** The readings listed for each lecture in the syllabus must be done BEFORE the lecture.
- 🌿 **Take good notes.** In lecture, I will explain the most significant concepts from your readings and present images and examples that may not be in your textbook. You are responsible for all of this information. Detailed and well-organized notes are critical for studying and learning in this course. Ask questions in class to help you connect the concepts. Review your notes after every lecture and before the next class.
- 🌿 **Connect the lecture notes to your readings.** For the test, you are responsible for information in the textbook as well as the lecture notes. Make sure that you are able to grasp the major concepts thoroughly and in detail. Use the summary and review sections of your textbook as well as images and diagrams from your text and masteringbiology.com. In addition, connect the concepts learned in lecture to the lab exercises.
- 🌿 **Review material on a regular basis.** Study the diagrams in your text and lecture handouts. Practice writing out pathways and linking the concepts. Use the blank figures handed out in class for your study. Attend your SI sessions on a regular basis. Come see me for individual assistance.
- 🌿 **Keep two things in mind.** One - learn terminology and most importantly, understand the relevance of that terminology to biological function. Second – this course is designed to make you think and not just to have you memorize facts. Memorizing facts is important to establish a basis for your knowledge but it is not sufficient. You must be able to use your knowledge to think logically and analytically. Many of the test questions will revolve around applying your knowledge. Therefore you should be confident of what you know and what it means.
- 🌿 **Be an active learner.** Develop study guides, comparison charts, and concept maps. Use the MasteringBiology (www.masteringbiology.com) web resources provided with your textbook. Complete assignments in *Practicing Biology*. Attend Supplemental Instruction and organize your own active study group. Don't be lulled into thinking familiarity is the same as knowledge. The latter takes time and an organized plan of study.
- 🌿 **Lab is equally important!** The laboratory component of this course is intensive and requires time as well. Please read your lab manual BEFORE lab and pay attention to the details. Take good notes and make detailed observations. Answer all questions in the lab manual either during lab or immediately following lab. Review the objectives and prepare a study guide for the lab materials and activities on a weekly basis. Learn to manage your time well and prepare in advance for the lab writing assignments. Pay attention to information about lab exams. Make use of open lab time.

Supplemental Instruction. SI is provided for all students in BIO 141. I will explain this important program that provides assistance for all students who wish to improve their performance in biology. The BIO 141 SI leader is Aida Risman this semester.

Ways of Inquiry (INO). Biology 141 is designated as a “Ways of Inquiry” or INQ course. In INQ courses, students “understand and question the way knowledge is sought by actively learning and practicing the discipline’s approaches to inquiry” (INQ Vision Statement). In Biology 141, you will have many opportunities to engage in biological inquiry by asking questions, designing experiments, reading and writing critically, and working independently to seek knowledge.

Sustainability: Life in Balance. This year many members of the Oxford College community will be exploring the theme of Sustainability: Life in Balance. In this course you will have the opportunity to connect your work in cell biology, energy transformation, and laboratory investigations to this theme.

Absences. The policy on absences and being late to class is provided in a separate handout. Unexcused absences or a failure to follow the procedures outlined in that handout ***will result in a significant reduction in your grade***. Any questions about absences should be asked immediately. Any questions about absences should be asked immediately. It is your responsibility to be aware of the policy.

Cell Phones: The use of cell phones is strictly prohibited in the classroom and the laboratory. Please turn off your phone before you come to class and leave your phone at the front during exams.

Photography with camera phones is also prohibited in lab and lecture.

Personal Computer. If you would like to take notes on your personal laptop in class you must seek special permission from the instructor. Use of laptops to surf the web, login to Facebook, Skype or other networking/chat during class is completely unacceptable.

Honor Code. All examinations and all work for credit in this course come under the regulations of the Honor Code. Your signature on your work attests to your upholding the Honor Code. Please read the information on **plagiarism** on the Library web page and always ask if you have any questions about assignments. Note that writing assignments will be submitted to **SafeAssign on Blackboard**.

Office Hours. I would like to encourage you to meet with me in person about any concerns or questions that may arise during the semester. Feel free to just drop by, or set up an appointment by email or after class.

Blackboard Site: Blackboard will have announcements, handouts, information about Practicing Biology questions, and more! Your SI and TA will email you from Blackboard. You will upload all writing assignments on Blackboard. The syllabus and other assignments for lecture and lab will be posted on Blackboard.

Additional Sessions. We have two required additional instruction sessions in this course for library and information technology. These sessions are held outside of class time and are critical for your laboratory assignments.

Exam Protocols. Do not come to any exam with notecards in your pockets or on your person. All cell phones are to be turned off and either in your bag in the front of the room or on the instructor’s bench. Do not write notes, study material, abbreviations, or material that can be construed to be these on your body. Check for such notations and remove before the exam time. These are considered to be a breach of the Honor Code.

Evaluation Criteria:

-  **Examinations** - There will be three lecture exams, each worth 100 points, including multiple choice, short answer and short essay questions. Exams will cover all material in lecture in addition to assigned textbook readings and other supplemental materials. Use the knowledge

you gain in lab to help with understanding the lecture material. The final examination, worth 175 points, is comprehensive. Three laboratory exams, each worth 50 points, will be given in this course. Each lab exam will cover the material from the lab exercises. The lab exams will include a practical and a written portion.

 *Scientific Writing and Laboratory Project* - You will write individual sections of a scientific paper for specific laboratory exercises. The lab also involves a group independent investigation as a research project. For this laboratory, you will prepare a group symposium presentation and write an individual complete scientific paper. Specific instructions will be provided in lab. This course meets the Continuing Writing Requirement (WR).

Evaluation Points: Students are evaluated on their performance in the classroom and the laboratory. The following is the distribution of points:

300 points	3 lecture exams	Final grade determination:
135 points	3 laboratory exams	90 – 100% A
175 points	final examination	80 – 89% B
35 points	scientific writing	70 – 79% C
75 points	lab project	60 – 69% D
720 points	total	<60 F
		Plus and minus grades are given

The instructor reserves the right to adjust dates and topics on lecture and lab syllabi if he determines it is necessary.
