

Biology 141 Introductory Biology I
Syllabus
Fall Semester 2000

Professor: Dr. M. Eloise Brown Carter
Office: Pierce Hall #105
Phone: (770)784-8343

Office Hours: Wednesday and Friday 10:00 – 10:30a.m. *Tuesday 10:45 - 11:30 in the library.*
 Students are encouraged to see the Instructor during class to make appointments for other times.

Lecture Hours: Monday, Wednesday, Friday 11:05 a.m. – 11:55 a.m. **Room:** Pierce 102
Lab Hours: Monday, 2:00 – 5:00 p.m. **Room:** Pierce 125

Required Text: *Biology*, N.A. Campbell, 1999, 5th edition, Benjamin/Cummings Publishing Co., Inc. Study Guide is available for sale in the bookstore and is on reserve in the library.

Required Lab Text: *Investigating Biology*, 3rd ed. Morgan, Judith Giles and M. Eloise Brown Carter. Benjamin/ Cummings Publishing Company, Inc. 1999. *Used lab manuals are not acceptable.*

OPTIONAL Lab Text: Rust, T.G., A Guide to Biology Lab, Southwest Educational Ent.

			Chapters
Aug.	30	Science as a Way of Knowing	1
Sept.	1	Major themes in Biology	1
Sept.	4	LABOR DAY	
	6	Heirarchies: beginning with living chemistry and water	2,3
	8	Building biological macromolecules: carbohydrates and lipids	4,5
	11	Proteins and nucleic acids	4,5
	13	Structure and function revealed in cells	7
Thurs., 14 th	8:30-9:30am	<i>Scientific Literature and Research</i>	<i>Handout</i>
		<i>Meet in the Humanities, Multi Media Lab</i>	
	15	Membrane structure	8
	18	Cellular transport	8
	20	Fundamentals of energy transformations: enzymes, ATP and electron carriers	6
	21(Thurs.)	EXAM I 8:00 a.m. – 9:30 a.m. (through membrane transport)	
	22	Cellular respiration I - Glycolysis	9

EMORY UNIVERSITY

050000003341

	25	Cellular respiration II - Transition and Krebs Cycle	9
<i>Tues, 26th 8:15 - 9:30 a.m. Scientific Data Presentation</i>			
<i>Meet in Humanities Multi Media Lab</i>			
	27	Cellular respiration III - Chemiosmosis and the Electron Transport System	9
	29	Preview and recapitulation - Accounting Day	
Oct.	2	Homage to photosynthesis	10
	4	Photosynthesis I: the light dependent reactions	10
	6	Photosynthesis II: the light independent reactions and variations (C4 and CAM)	10
	9	Review and recapitulation; Problems	
	11	Cell reproduction: mitosis	12
	12 (Thur.)	EXAM II 8:00 a.m. - 9:30 a.m. (through photosynthesis)	
	13	Sexual reproduction: meiosis	13
	16	***FALL BREAK***	
	18	Chromosomal mutations and gametogenesis	13
	20	Mendelian inheritance, a new vocabulary and paradigm	14
	23	Understanding the basis of inheritance	14,15
	25	The buffet of genetic expression	14,15
	27	DNA structure and replication	16
	30	Gene to Protein I: transcription and the genetic code	17
Nov.	1	Gene to Protein II: translation and genetic mutations	17
	3	Control of gene expression	19
	6	Review and recapitulation: genetics	20
	8	Charles Darwin and the changing paradigm	21
	9(Thur.)	EXAM III 8:00 a.m. - 9:30 a.m. (through genetics)	
	10	Evidence for evolution	22,25
	13	The power of molecular evolution	23
	15	Bryophytes and seedless vascular plants	29
	17	Sexual reproduction in seed plants	30,38
<i>Genetics Papers due in class</i>			
	20	Review of plant evolution	
	22,24	**THANKSGIVING HOLIDAYS**	

27	Plant structure and function	35
29	Transport in plants	36
Dec. 1	Ecology I: population and community dynamics	52,53
4	Ecology II: ecosystem structure and function	54
6	Ecology III: nutrient cycling	54
8	Ecology IV: review and recapitulation	
11	The Big Themes Revisited	

*****FINAL EXAMINATION***Friday, December 15th from 2:00p.m. - 5:00 p.m.**

FoxTrot

BILL AMEND

**BIOLOGY 141 - LABORATORY SCHEDULE
FALL 2000**

**Dr. Eloise Carter
Dr. Bruce Ostrow**

<u>Date</u>	<u>Lab Topic (#)</u>	<u>Writing Assignment</u>
Sept. 5,7*	Scientific Investigation (1)	Materials and Methods
11,12	Microscopes and Cells (3)	
18,19	Diffusion and Osmosis (4)	Introduction, Reference & Cited
25,26	Enzymes (2)	Results, Figures & Table
Oct. 2,3	Respiration and Fermentation (5)	Discussion
5(Thur.)	LAB EXAM - 1,2,3,4 (8:15-9:30am; 9:30-10:45am)	
Oct. 9,10	Photosynthesis (6)	Figure
16,17	**FALL BREAK**	
19(Thurs.)	Introduction to Genetics Project (Handout) Sign up for session 8:00-9:30 am or 9:30 -11 am	
23,24	Mitosis and Meiosis (7)	
30,31	Power Point Workshop & Genetics Open Lab	
Nov. 2(Thurs.)	LAB EXAM (5,6,7) (8:15-9:30 am; 9:30-10:45 am)	
6,7	Genetics Symposium	Scientific Paper
13,14	Plant Diversity I: Bryophytes and Seedless Vascular Plants (15)	Papers Due 11/17
20,21	THANKSGIVING BREAK	
27,28	Plant Diversity II: Seed Plants (16)	

*Students in Monday lab will meet on Thursday, September 8th for Labor Day Week ONLY!!!
See Dr. Carter to resolve conflicts.

LAB EXAM (15, 16, 19)

(8:15 a.m. - 9:30 a.m. and 9:30 a.m. - 10:45 a.m.)

BIO 141 laboratory meets in Pierce 125.

STUDENT'S GUIDE TO BIOLOGY 141

Welcome to Biology 141! The information in this handout and accompanying materials must be read and followed by all students in Introductory Biology. If you do not understand everything in this handout, you should ask for clarification.

Introductory Biology (141) is designed for students who **plan to major in biology**, attend **professional school in a health related field, or have a strong background in biology** and have chosen biology to fulfill their distribution requirements (or just for the joy of it). This may be one of the more difficult courses you will take, demanding that you not only learn detailed and complicated information, but that you also organize this information within the major concepts of biology. This information will be essential to your success in other biology courses, where your competence in basic biology will be assumed. In addition many of you will be taking examinations to enter graduate or professional schools, and the knowledge you gain here will be required later.

Studying. If you are an average reader, you should spend about **8 hours a week** outside class working in BIO 141. If you are a slow reader, you will have to spend more time. Whatever you do, do not allow yourself to fall behind during the first couple of weeks, as it will be extremely difficult to catch up. Similarly, cramming, or pulling an all-nighter, does little good before an exam in this course, because you must be mentally alert during the test.

The best overall study **approach is to read assignments over quickly at first, like a novel, for an overview. Then read more carefully, jotting down questions or areas of confusion for later checking and review.** After you are reasonably confident of your knowledge, **arrange to have a study buddy ask you questions.** Answer the questions in the book and study guide. Be sure you understand **terminology**, and that you have carefully reviewed and understand **diagrams** in your text and class handouts. It is helpful to **prepare your own tables and diagrams** as a study aid and review for much of the material in BIO 141.

College courses generally require you to know much more material, and the material is presented at a much **faster** pace than in high school. This means it is more difficult to catch up if you fall behind. In BIO 141 it is also necessary to demonstrate thinking, as well as memorization. **Memorization** may be a skill which you mastered in high school, and it is still very important, but it **is not sufficient** in college. You must be able to demonstrate that you understand concepts and that you can apply them, as well as simply stating them. You will gain experience with this in the classroom, laboratory and on examinations.

One of the most common problems for well-prepared students in introductory biology is their **familiarity** with the subject. They are confident that they understand the material and are prepared for a test, because they recognize all the terms, and the concepts make sense. **Don't be**

lulled into thinking that familiarity is the same as knowledge. You will be asked to differentiate between very similar answers, to provide complete, thorough and precise answers. Don't be caught wishing you had really studied!

Supplemental Instruction (SI). is provided for all students in BIO 141. The instructor will explain this important program that provides assistance for all students who wish to improve their performance in biology.

Examinations. The lecture exams will be a combination of multiple choice, short answer and short essay questions. Exams will cover all material covered in lecture in addition to assigned readings in the text. The final examination is comprehensive. Students should feel free to ask questions during the exams about any question that is unclear.

Scientific Writing and Laboratory Project. Students will write one section of a scientific paper for four laboratory exercises. Students will implement an independent investigation in genetics. For this laboratory, they will write a complete scientific paper. Specific directions will be provided in lab.

Honor Code. All examinations and work for credit in this course come under the regulations of the Honor Code. Your signature on your work attests to your upholding the Honor Code.

Absences. The policy on absences is provided in a separate handout. More than four absences in lecture and unexcused absence in lab, or failure to follow the procedures outlined in the absence policy will result in a reduction in your grade. Any questions about absences should be asked immediately.

Evaluation. Students are evaluated on their performance in the classroom and laboratory. The assignment of points will be:

300 points	3 lecture exams
150 points	3 laboratory exams
175 points	final examination
25 points	scientific writing
50 points	lab project

700 points total

Final grade determination:

90 - 100%	A
80 - 89%	B
70 - 79%	C
60 - 69%	D
<60	F

Plus and minus grades are given.

08/00

ABSENCE POLICY - Biology Department

All students are expected to attend all lecture and laboratory sessions. However, emergencies may arise which will necessitate absences from class. Students are allowed 4 cuts in lecture and NO CUTS in lab. Students may only miss lab without penalty in cases of illness, family emergency or a school sponsored event which is cleared with the professor in advance. Students are responsible for all material which is covered in laboratory and lecture. When possible, students will be allowed to "make-up" laboratory material missed due to an excused absence, however, because of the nature of laboratory material, actual "make-up of missed activities is usually impossible.

PENALTIES

Students who exceed the 4 cut limit in lecture for whatever reasons or have an unacceptable absence from laboratory will have their FINAL grade reduced 5 points per absence. Students who miss 2 labs without acceptable reasons will fail the course (see below).

LECTURE ABSENCES:

THERE ARE NO EXCUSED ABSENCES FOR LECTURE. Each student may be absent four times without penalty. These four cuts may be used for any reason: illness, studying, travel, family emergency, etc. However, ANY additional cuts will result in grade reduction. USE YOUR CUTS JUDICIOUSLY, e.g. for sick leave only.

ACCEPTABLE LABORATORY ABSENCES

Although no discretionary absences, i.e. "cuts", are allowed regarding laboratory, on rare occasions, illness, family emergencies, or certain school sponsored events may make it necessary for a student to miss a laboratory session. The instructor MUST be notified prior to the day of the absence in all but the most extreme emergencies.

In all cases, the final decision regarding whether or not an absence is acceptable will be made by the instructor.

AN UNACCEPTABLE ABSENCE FROM LABORATORY RESULTS IN A FIVE POINT REDUCTION IN THE FINAL GRADE. TWO UNACCEPTABLE LABORATORY ABSENCES RESULT IN FAILURE OF THE COURSE.

MISSED TESTS

Ordinarily, tests cannot be made up, however, this is up to the instructor. If a student misses a test, and the absence is acceptable the missed test will not count either for or against the student. If the absence is not excused the grade will be a zero. Students are cautioned that any excuse for missing an exam will come under severe scrutiny by the instructor. THE INSTRUCTOR MUST BE NOTIFIED PRIOR TO THE TIME OF THE EXAM, AND THE INSTRUCTOR MAKES THE FINAL DECISION REGARDING WHETHER OR NOT AN ABSENCE IS ACCEPTABLE.

Laboratory tests which are missed for a reason that is excused MUST be made up. The instructor must be notified prior to the time of the test.

RELIGIOUS HOLIDAYS:

Students must notify the instructor one week in advance if they intend to be absent for a religious holiday.

TARDINESS

Being late to class is rude and distracting. Continued tardiness by any student will result in the assignment of absences and ultimately a reduction in the student's grade. Three tardies equal an absence. The tardy student is responsible for notifying the instructor that she/he entered the classroom late and, therefore, was not absent. The instructor reserves the option of excluding a person from further classroom or laboratory participation if the student is continuously tardy.

Falsification of information regarding absences from class or laboratory will be considered as a breach of academic integrity.

CLASSROOM AND LABORATORY GUIDELINES

Department of Biology

- I. Eating and drinking are not allowed in either classrooms or laboratories. Therefore, do not bring food items and beverages to class or laboratory. Remember that the use of tobacco in any form is forbidden in Pierce Hall.
- II. Students are expected to wear appropriate attire in classrooms and laboratories. This certainly includes the wearing of shoes.
- III. Students must be safety conscious at all times but especially in the laboratories. Special procedures will be reviewed during laboratory sessions as needed.
- IV. All students are requested to help with housekeeping in the classroom and laboratory.
- V. In Biology 142, 121, and 122 certain designated dissection specimens may be taken from the laboratory with the instructor's permission. The instructor will identify those specimens which may be removed for study elsewhere. These specimens must be returned on or before the time the instructor announces for their return.
- VI. Except for the exceptions noted above (V) materials may not be taken out of the laboratories. This includes microscopes, microscopic slides, demonstration notes and materials, charts, and all other items which are to be found in the laboratory.
- VII. Violation of any regulation noted in Sections V and VI above will be treated as a breach of academic integrity. Therefore, such violations will be immediately reported to the Honor Council.
